Apply a heating compress to the throat or chest as needed. Start with a cotton or flannel strip about 2" by 16 inches, wet in cold water. Wrap this

cloth around the throat. Next, completely cover the wet piece with a plastic sheet cut to fit the size of the cotton strip. Finish off the compress by pinning a scarf or piece of wool in place snugly, so that there be no slipping of the plastic and no evaporation from the wet strip. Note: Do not add ointment on the skin before doing this treatment. – Duration: **45** min.
